## PVAcrycolor

### Estetico, esclusivo e inalterabile

La perfetta fusione del PVC e del vetro acrilico. Per finestre in PVC colorate, resistenti, antigraffio. PVAcrycolor è il nuovo trattamento Finestra Italia disponibile in per tutte le finestre della serie PV6, PV6K e PVDOOR.

### I Vantaggi di Acrycolor

- Estrema resistenza agli agenti atmosferici;
- colore indelebile;
- antigraffio e resistente;
- minima manutenzione;
- qualità estetiche uniche.

Diversamente dalle pellicole, lo strato acrilico aderisce come un tutt'uno sul PVC, combinandosi indissolubilmente.

### Combinazioni bi-colore - design fuori dagli schemi

- Bianco massa su un lato e pellicola sull'altro
- Pellicole diverse su ciascun lato
